

I own the Bizarre Café on Newton Rd. All of you who know me, knew me to be a chain smoker averaging 80-100 cigs a day. Though the desire to stop smoking was there, sadly the willpower was lacking. Even developing metastatic throat cancer did not deter me from continuing the habit of a lifetime. I spent years searching for someone or something which would stop me from smoking without suffering withdrawal symptoms. Patches, gum, Zyban, Champix, hypnotherapy all failed. When I visited Mr. Ali's practice, I was convinced that this would merely constitute yet another failed attempt. Despite my cynicism, after just 2 sessions I stopped smoking. That was 2 months ago. I haven't touched a cigarette since, nor craved one. I still can't believe how easy it was. This multi-disciplined system using advanced hypnosis, bioresonance and laser really works
